Religious Institutions “Go Green” to Combat Global Climate Change

The Long Island Houses of Worship Clean Energy Committee, coordinated by the Neighborhood Network, will be conducting a workshop, “Energy Efficiency for Religious Institutions” on Thursday, May 10, 2007. This important environmental event is sponsored by Molloy College and will be held at the College’s Suffolk Center at Republic Airport in East Farmingdale. There is no fee for this workshop.

This workshop will address the critical juncture that science and religion have come to: the global concerns regarding shifts in climate. The focus of this workshop will be learning how places of worship can become more energy efficient to benefit the Earth while lowering the financial burden of energy costs.

The Long Island Houses of Worship Clean Energy Committee is made up of various faith-based organizations: Catholic Charities, Unitarian Universalist Fellowship of Huntington, St. Martin of Tours Outreach in Amityville, Sophia Garden, the Long Island Council of Churches, New York State Interfaith Power & Light and Molloy College.

For more information about this event, contact the Molloy College Office of Public Relations at 516.678.5000 ext. 6300.
